

Young or old, whatever your age everyone enjoys the antics of the cunning Road Runner as he baffles and bemuses poor Wife E Cayote. Or does he?!!

This is your chance to really find

out as you take on the role of Road Runner in this comic, all action extravoganza that recreates these noil biting chases and the fast moving excitement to perfection. Speed through canyons and along the highways following the trall of birdseed left for you to feed on (in this the first trick???) Dodge your way round the onrushing trucks keeping an eye out for the perdous mines and feather ruffling, leg busting oil slicks. What dastardh plans has the sleazy Wile E. Covotel got in store for you as he lurks in hiding, cowardly awaiting his moment to enjoy a succulent roas of "Road Runner and French Fnes-We're sure you'll overcome all'the dirty tricks he can throw at you with ease, agility and grace and a haughty "Beep Beep". Overcome them that is if you've got nerves of steel, the reflexes of a wildent an the speed of the fastest bird on two legs, otherwise its sony, goodnight and "Burp Burp"!!!

THE name DOUGLAS ADAMS should ring a few bells, If it doesn't, try The Hitch-Hiker's Guide to the Galaxy. The original book spawned a radio series, which is turn be same a TV show, an adventure game and it's soon to be a full-length movie. Mr Adams has been working with Infocomen between cups of tea and

Tust about everyone you meet has beard of The Hitch-Hiker's Guide and the other books that make up the Hitch-Hiker trilogy. Buttlid you know that Douglas Adams also spent time writing Doctor Who scripts - a golden period this, with Adams writing and Tom Baker playing the ultimate Doctor -- or that he was involved with Lucasfilm's Games Division during the development of

Labyrinth, the David Bowie movie spin-off. Hitch-Hiker's Guide has already been transformed into a game - hut Bureaucracy in Adams first purpose written adventure. So you want to know more?

Why not just invite him over, put down some biscuits and tea, and ask? Unfortunately/Adams doesn't seem to be the khad of party animal you can entice with such

goodles. So a phone call la made and a clever plan is put into effect. Members of C+VG's Stealth Division disguise themselves as Douglas Adams, and hide inside the mirrors of his hidden London flat Then, whilst Adams innocently checks his appearance and runs a finger through his hair WHAM - he becomes the

I came to feel that someone really together, one who was well organised would always know where his towel was. I C+VG: Did you map out solutions to all the

problems Arthur would get into beforehand? D.A.: Not at all. Writing has to take the writer, as well as the reader, by surprise jettisoned into space, well that seemed to be the end of it all right there. I racked my brains trying to find a way to rescue them without "with one bound, Jack waa free" entering all. Then I remembered a TV show on Jude I had seen, A small man can toss a heavier opponent because he's using the other's weight against him. But while you're waiting don't miss out on our great Gobots competition.

First prize is the whole range of Gobot toys—

that's 12 in all (gasp) PLUS a Gobots video Battle of the Rocklands (wow!) Two runners-up will get a copy of the video

(cort). And that's not all. The next 15 people will get Gobot T-shirts (gosh!).

So how could these goodies be yours? That's easy if you're a keen Gobots fan

On this page are six Gobot figures. They are Turbo, Scooter, Leader-1, Cy-Kill, Crasher and Copter. But which is which? All you have to do is to identify each Gobot.

Send your answers to Challenge of the Gobots, Computer + Video Games, Priory Court, 30-32 Farringdon Lane, London, ECIR 3AU. The closing date is July 16th and the editor's decision is final. Got it?

I tried to like this album. I really did I mean, lead singer Ann. Boleyn has had a hard time. She louned the band in 1982 in a 50-called hanned house where she

The neighbours organised a petition and forced her and the band to move out of the area. Then a managized deal with Ronner Dio lell through and the hand only up.

dream die and lought to pnt a new band together. This she did and after a highly successful four hey received recording offers from babels and producers. Am finally show Mikey Davies to produce this album and he has a pedigree that can boast the tikes of producing the likes of Ted Nugent

So there you have the sad story of Ann Boleyn and Hellicon 1 would like to say the album is great, but the lact is that they are just another ran of the mill rock and roll band.

They give \$10% effort, but I'm alraid it just doesn't elek Ann never gives her vocals a real chance. Hall the time she ends up sounding like a watered down version of her ex-promoter.

Roanse Dio
The rest of the hand are quite compelent, but the songs are musically shallow and the lynes are at times, downright over the top, even by heavy metal

I m alraid they will have to produce better quality stuff than this middle of the road drive! to unpress the likes of me and, I suspect, you

As we all known Gary Moore Was a great friend of the late Phil periods of time with Thin Lizzy Gary has dedicated this whole album to Phil and it shows

Nearly all the sougs are really what they would be like if Phil way alive to sing them now as they would have suited his vocal vivle

Of course, the music is of the highest quality, with Gary pulling out all the stops with his guitar style and sauging.

If I have one gripe about this album it is a small one I would have rather seeu a couple of new tracks added to the album instead of having BOTH seven and 12 inch versions of Over the Hills and Far Away and Wild Frontier A dynamic album and a great inbute

Know what I want to be when I grow up? No, not an astronaut, or a rock star, what I want is to be a comic book hero! So how can I resist the fare of having a go at Accolade's Comics?

This is the FIRST interactive comic book. Steve Keene is

your Superspy alter ego. He's lip, shiewd, daring, and just a bit of a smarty pants. The mission unfolds betore your eyes as individual panels appear on screen. Each panels appear on screen. Each panels is one piece of the action, and there are six of them to each "oase"—the bottom two

scroll to the top after they are presented. A number of things can happen in a panel. There might be an animated sequence to watch for clues and

dialogue going on between you and other people. The word halloons over your head change to match your whim or mond of the moment.

Certain exents force you to tight for that next panel, or to be more explicit — for your life! Suddenly you find you self no me of eight accade sequences, dodging mesiles and bombs, batting robots or shales. You must overcome this "game within a game before you can continue You can also make a wrong decision leading to violent results in the panels part as

well.
Cornics gives you two
different stonies to participate
in In one, you must rescue a
not-so-mad scientist and his
secet formulae from evil
hands.

Hi, and welcome to the lotest C+VG look at the currently grawing world af 16-Sit Personal

camputers, We've

already looked at the ST market, and have came to the conclusion that these

machines are fantastic, Naw It's the turn of the

Cammadare Amiaa. The Amiga's created a lat of

Interest and excitement since its launch in 1985. In the next few pages we're cavering the latest new packages to appeor.

AmigA NewS

▲ Tell me how you feel? Gutter!! That's going to be the reaction of same existing Amigg owners now they've heard about Commodore's

Amigas. Commodors ors introducing two new Amigas this year, the A500 and the

Home Micro", this A500 mochine is a cheaper Amigo. and about time too. The price I paid for my A100 was a bit

steep, but I'm glad to see that ather people will soon be

jaining the Amiga ranks.
The AS00 will sell for around £570. This machine will have 512k of RAM, (expandable to ane megabyte) a built-in dauble sided 800k disk drive mad to will allow

Inside the A500 you have exactly the same stuff as the A1000, except the chips maybe a different shape. This is

because they have dropped the 'Proper Camputer' look in order to make the A500 look like a C128. This is one feature which I don't like for one

reasan — the parts.
The parts on the A500 are in different places to those an the A100, which means some peripherals already avoilable will not fit to it, this is a great worry far new A500 and exatting A1000 awment, like

The problem for the existing Amiga owner is that if the A500 catches an, ony new add-ons will be built with this in mind, not the A7000. This is immensely irritating as Amigas were not exactly cheap when

we baught them.
The problem for A500 owners will be whether or not the hardware people will redesign their existing products to fit A500s, another worrying problem.

The other new Amiga is the A2000, which comes with all the some graphics, sound and staff as the other two, but if has a cauple of new interfaces and an open architecture.

an 'open architecture'.

This means that you can plug in various boards, one of which enables it to emulate a IBM PC.

The A2000 has mare memory than the others, if comes with one megabyte as standard. This is mainly for the fact that it is a business machine, and you need late of RAM. This can be expanded to

a huge five megabytes.

The machine also comes with the usual double sided

880t drive, but it has roam in the body for more drives. So with all this being founched, there must be an amage for you. There should be about 300-400 tilles ovaliable when the A500 his town, more than enough to choose fram. As for the A2000, it's already in the shops, selling for £1.259.

Deja Vu turned a lot of heads when it first appeared for the Macintosh, but Icom's adontian on the Amiga is fantostic. Yau're a detective wha has last his memary and has to find out what is aging an in the 1930s warld of American agnasters and corruption. Wonder what's behind that chair in the dirty apartment building? Don't type in a questian or try to discern clues drawn on the screen use the mause to mave the chair and laak behind it Desa Vu makes full use of colour and sound to enhance atmosphere This cambines with graphic realism to turn what could have been a run of the mill status adventure with pretty pictures into a real auest

Discavery Trivia is an entertoining game despite being based on the two ald ideas — platform games and Pac-Man, Yau control a male. or female earthling, o rabot ar an alien abaard a carga ship that has had an accident. Its contents of olien animals has escaped and are running amok through the ship All power is down as these little suckers have stolen the energy crystals and hidden them You search throughout the ship, recavering crystals while avoiding the zao-an-the-loase and their deadly energy draining touch Only then can you refuel the ship and cantinue an your journey. Excellent animation, great calaurs and depth add to the feeling or realism. There are alsa neat sound effects. But what is there to make this mare of a challenge? Haw about lacked doors that need a correct gaswer to let you through? Speed and reflexes aren't en augh. Knowledge af The Twilight Zane, camics, people and places are all vital Electronic Art's

Deluxepoint was a dream came true far would-be-artists Now toke all this power and odd sa many features that you can't list them all. The results? Deluxengint II

Name a feature Zaam? Haw about a vanable zoom resolving dawn? Or a "Fix" made that turns the image into an unchangable background that can be drawn aver without actually being changed. Then there's Stencil, which places drawings in front of, or behind objects. Four different calour cycles for animation effects meld with variable image sizing-increase the "page" to go past the screen, ar eliminate borders when transfering to videotape Turn a picture into a ani additional memory 3D perspective by setting coardinates and then smoly clicking the mouse Convert arcles into spheres or nick up any add shaped object and leave the background behind And much much morel Using icons makes for on

Saftware creates a friendly space between the user and CII in the farm of "Hat Keys" which can access specific functions Nnw Tak's Digi View

Videa Digitiser takes the worry and camplications out of transferring real images onto the computer screen. Used for C+VG's Space Camp feature (January 1987), the unit attaches to the parallel port and also to a black and white videa camero. The camero than takes those purtures of the object to be digitised - one each through a red, areen and blue filter. Saftware combines these into one calour picture which can be modified

 Another way to go is with Commadorn's Genlack This attaches to the RGB port of the Amiga and displays a real time black and white ar calour picture of ony incoming source connected to d. VCR, television and the like. The incoming image replaces the background colour and allows

the overlay of computer images. Of course, the anscreen image can be altered

as well as parted back aut to another source. An exating mings of effects become passible fram real time mavement with graphics on ton to animotion taking place in front of actual settings and landscapes The Genelock is fully provided, with an RGB out part a composte Video Out part four inputs for audia and Iwo dutading

With so many things going becomes vital. One way to get a bit mare comes free when you install the Kickstart Eliminator Kit, from CMI. These are a set of POM chos which must be soldered onto the Amipa's matherboard. This can be a bit tricky, sa best have il done by sameone computent of you have any fears. But cansider what you get once that's dane First, you now have no need to boot up the Kirkstart disk, because all that 1.2 information is now raring ta an within seconds of turning on the computer. Plus the 256K. of special RAM used anly for Kurkstort is now free and available But if you wont a good chunk of RAM, than try the Allegra E RAM board fram Access Software. The unit comes standard with 512K. and can handle an additional twa megabytes. It easily attaches to the side with two screws in a few seconds (through the expansion slat), and even derives its power

After a brief playtest of the game at their London HO we at C+VG reckon you're in for a bit of a treat -- especially if you're the owner of an Atari ST. Indiana Jones could just be the most playable ST game released to date. Big words? Well, just wait and see.

The game is set inside the Temple of Doom, the labyrinthine underground complex ruled by evil Mola

You'll remember that the ellmax of the movie takes place here as Indy atlempts to rescue slave children from Mola Ram and his nasty Thuggee There's a fight through

nineshafts, a desperate ride on

a mine-railway and a battle in the temple itself. All this and more has been nacked into the

arcade and computer games. Armed only with his Irresty whip. Indy has to resone five slave children, smashing the locks of their cages with a well

aimed crack of the whip. That whip comes in useful beating off the nasty Thugger suards if you're good enough you can lash them over the edge of a cliff. Otherwise your snake-like weapon simply stuns

them for a while The children are locked in individual cages hidden to the vorious levels of the mine sequence. This is the first stage of the game. And lody has to negotiate rickety wooden ladders and rock strewn narrow pathways.

Hit piles of skulls and snakes with the whip for extra points. Make It through the mine and you're all set for the mad collectorster eide on the mine

excatly a compliment

 Conan the Librarian: Glad you enjoy the microsells, Julian, Even if we wanted to we couldn't put all the adverts into one section. The way a magazine is produced if makes it impossible. The review however, do tend to be allogether and we do carry quite a few for the BBC and Electron. When was the last time you saw new Vicou Our games, Julian! We can't remember. We dropped the charts

because they are out of date by the time you get to read them. It's one of the problems of producing a monthly mag I have been reading your

 Lots of companies use creenshots from, say a Spectrum game to promote a Consmodore or Amstrad conversion. It's annoving but probably done to cut down on packaging production costs. The best way round it is to ask to see the game before you buy. I've already explained about the charts Hopefully, Karl, the free

arcade booklet which you've no doubt already discovered fixed to the front of last month's C . VG will have some a long way to meet your demand for more areade stuff. And talking of arcades . . .

 Lam winting to you as I have a onesy and freel that you are ' in the krusy where I could buy and addresses of some of the his names

Conan regires. It is possible to here old accode machines but it's

not that easy to find out where you can get them. Ask at your local areade. Although they probably word call you the muchan then may be able to tell where they send the old ones. But be warned They aren't cheap. The purce would obviously depend on popularity, agr and condition. Sul oni sources suggest prices would

 m an adventurer and I meating to say that Keth's pages are gitting Kerth lost interest?

Conan replies. What a wally! KC lost interest? You must be toking: C+VG's adventure names are the bestyou'll read in ANY mag

♦ Will your PLEASE do somethous

Conan replies: You want a weekly C+VG1 Don't you realise how difficult it is to get Craig out of bed long enough to do a monthly? Still, what do the rest of you reckon about a weeldy games mag?

 I have just got my hands on a Live got news for you in already has' I glayed the game at Butlins

xclusive | Exclusive Tony Tokoushi picks his nosal

Wow what thrills... As you may have authored from the above, I am realiy noffed off about the use of the ward EXCLUSIVE. I am sick and tired of people making o bla deal about hoving exclusive this and exclusive that.

Before I go on, I have to say I try to get on exclusive every month for C+VG readers in my Hot Gossip page. But, and It is a BIG BUT, the exclusive is to

sotisfy MY need to give you something hot and new to read about. The fact that I may

hova an exclusive on a game speaks tar itselt, and the reader will see that It he reads C+VG and other mags over a period of time I do not plaster the

word exclusive across my page even though most of my reviews are way ahead of other way cheed a oriel mags. Examples of my "exclusives" being Marcenary / Gunship / Killed Until Dead / Batalyx / numerous ST games blah, bloh, blah.

The whole situation got very petty ond unprofessional with the Sinclair User parady by Crash, but this seemed to settle the exclusive revis w scane far a while

Magozines are on information service and they try to bring you, the reader, the most Interesting into as early os possible. The ward exclusive is to my mind most effective when used sporingly.

My criteria in what to bring you in Hot Gossip is that the game is HOT. I will not review a game that I do nat like. Thus it I see o game that i like, I will approach the author and promise him space in Hot Gassip if he can give me a scoop.

Alright, I have int off cterm NOW YOU LET OFF STEAM Da you give o damn whether the reviews

yau read are Exclusive pr not? I wauld really like to

know (ond most everyone in publishing I would imaginal) so put aside five minutes tonight and write to me a letter telling me what YOU think.

have got my hands on a hat little shoot-'em-up that is driving me wild! Ity colled Killer Rings d comes from Tony Crowther, It runs on the Cammodore 64 and is due soon on a budget label from Airolasoft.

tike most good shoot-'emons. It is nice and simple. You annihilate everything that oves. The title screen has hree options, sound (either spot sound effect or bockground music), easy or hard levels and the choice to play from keyboard by

defining your own keys. Forget the background on! It is really funky stuff, and thumpy, thumpy take 'em out' tunes I have EVER heard metallic gyroscope and you

Killer Rings

can move this around the bottom half of the screen spewing out death losers up ... and down the screen. Above you there are fat, squat, hairy looking flies walking across the

The flies poet off from the formation and zoom down on ground you, teasing you to go for them. They also drop lethal bombs oo you and contact is fatal - you lose one of your four lives.

Your loser can shoot the flies and the bombs they drap on you. When you skelot either bombs or flies they explode with zillions of colourful bits

zipping around the screen. On level three you get metallic log rolls to shoot and accurate shooting is in order. I evels five and six have you facing the same fat, ugly flies again but they are more pround the top row of the screen regenerating the flies

you kill Level seven has you facing that old brute the Mathership andiyou have to shool a tradmon the mothership releases hardes of flies to keep you on the make and away

Lots of colour, blow away oction and some really groavy groavy music to zap along to make this a budget offering you cannot miss
